PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years building distributed systems in Go and TypeScript. Passionate about developer tooling, observability, and mentoring junior engineers.

WORK EXPERIENCE

Software Engineer II | Stripe

Jun 2023 – Present

San Francisco, CA

- Designed and shipped an idempotency layer for the payments API, cutting duplicate charges by 94% across 40M daily requests.
- Led migration of 12 microservices from Kubernetes 1.21 to 1.28 with zero downtime
- Mentored two interns who converted to full-time offers.

Software Engineering Intern | Datadog

May 2022 – Aug 2022

New York, NY

- Built a Go service to deduplicate log ingestion streams, reducing storage costs by \$180K annually.
- Wrote integration tests covering 85% of the new ingestion path.

PROJECTS

Latticework — Open-source tracing dashboard

2023

- React + TypeScript front end over a ClickHouse backend; 1.2K GitHub stars.
- Implemented span sampling that reduced UI render time from 4s to 300ms on large traces.

Pantry | Rust CLI for recipe scaling

2021

- Parses 30+ unit formats and handles fractional conversions with property-based tests.
