

Johnathan Carrizales

San Marcos, Texas | Email: JohnathanE.Carrizales@gmail.com | Phone: 8329073909

Detail-oriented Computer Science graduate with extensive experience in Python, Java, and data-driven application development. Skilled in machine learning, data analytics, and developing scalable ETL pipelines.

SKILLS & INTERESTS

Languages: Proficient in Python, Java, C++, JavaScript; Frameworks/Libs

Data/Databases: Data Cleaning, Feature Engineering, Data Analysis with Pandas, NumPy, Matplotlib

Cloud/DevOps/Tools: Experienced with Git, GitHub, Linux, VS Code, Jupyter, AWS (SQS, Lambda, S3, RDS)

EDUCATION & HONORS

Texas State University – San Marcos, Texas

Graduation Date: 2022 - 2025

Bachelor of Science in Computer Science

Major: Computer Science

GPA: 3.7

EXPERIENCE

Outlier AI – Remote

October 2024 - Present

Contributor

- Analyze AI model outputs to enhance accuracy and reliability in text, image, and code tasks.
- Provide strategic feedback for model refinement, supporting system enhancements and performance improvements.
- Adapt to evolving project requirements and model updates, ensuring continuous enhancement of AI systems.

Code Ninjas – Deer Park, TX

April 2021 - March 2022

Code Sensei

- Taught JavaScript and project-based programming to youths, enhancing engagement and technical skills.
- Led curriculum improvements and received promotion for impactful leadership in educational programming.
- Collaborated with team to maintain a structured and safe learning environment, improving program quality.

PROJECTS

Crash Severity Prediction using Machine Learning

- Developed models using Random Forest and Logistic Regression to predict crash injury severity from 190K+ records.
- Achieved a 60% reduction in false negatives through feature engineering and hyperparameter tuning.

Cancer Diagnosis Expert System

- Engineered a Python-based expert system to support real-time medical diagnosis, utilizing both backward and forward chaining.
- Designed a user-friendly GUI for symptom input, enhancing system accessibility and performance.
